## ***Subject: GIBBZ-STAR “Join by Fix” Change***

---

**PURPOSE:** This bulletin changes the join by fix used for aircraft flying the GIBBZ-STAR from the JARLO or SITTR transitions. This change is to mitigate the need for a point out with LURAY and to align with upcoming PCT SOP changes.

**PROCEDURE:** ZDC may clear aircraft no further than KILMR on the GIBBZ-STAR. The procedural altitude entered is still 11000 (110P).
