
Bulletin: vZDC-ZDC-B-20250801

Applicability: Enroute Controllers

Effective: 1 August 2025

Expiration: 31 December 2025

Reference: vZDC & USNv Letter of Agreement, dated 1 August 2025

Contact: vZDC/ATM

Subject: Warning Area Working Frequency Designations

PURPOSE: This bulletin provides working frequency guidance for controllers to issue to aircraft working special use airspace in accordance with the vZDC and USNv (VSOA) Letter of Agreement.

PROCEDURE: The following frequencies will be used as the primary working frequency for aircraft based on the airspace the aircraft is cleared into. Controllers do *not* need to monitor the frequency, but, should have it displayed as a secondary frequency to key if contact with the pilot is needed.

<u>Warning Area</u>	<u>Working Frequency</u>	<u>CRC Position Label</u>
W72	118.12	ZDC – Warn 72
W107	135.72	ZDC – Warn 107
W122	135.87	ZDC – Warn 122
W386	132.15	ZDC – Warn 386
